Introducing the Xbox Ambassadors Accessibility Explorer Path

Announcements Starl1ght Oct 3, 2022

Happy October Ambassadors!

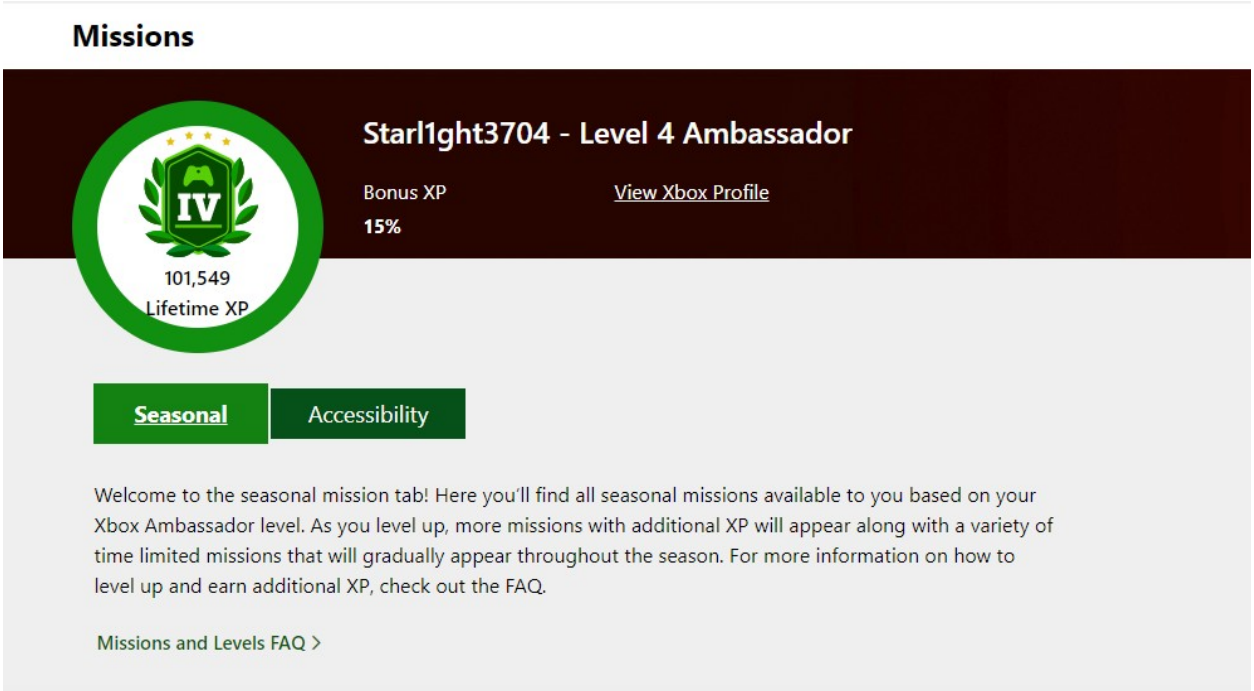
As we get into the new month, that means Season 28 has arrived. With the new season, we have some new changes to your Ambassador Dashboard. While the Dashboard is getting a fresh coat of paint, we're also adding some additional features to make the Ambassador experience better for everyone!

Level Tab Changes

First, Level tabs have been removed on the dashboard. You'll still be able to check your level and tier status under the profile tab at any time. You'll be able to see your season XP and lifetime XP from the profile tab as well. Your XP will also be visible at the top of your missions' page.

New Mission Tabs

With our dashboard changes, we've added new tabs for different kinds of missions. We want you to be able to choose a path and complete the missions that matter the most to you. This will also make finding the type of mission you want to complete easier and let us add different mission categories in the future. All the seasonal missions will be under the "Season" tab. This is where missions like creating LFG's and Featured Games will be. Here's a sneak peek at the new Dashboard and where you can find your missions moving forward.



Additional missions and your XP modifier will still be available depending on your Ambassador level. In the future more mission tabs will be added to give you a wider variety of missions to do.

Accessibility Explorer Path

While in the future we'll be adding more mission tabs, for now we're starting with a new Explorer Path. For Season 28 the first mission tab and pathway we'll be adding is for accessibility!

The Ambassador program strives to make gaming for everyone, and we want all Ambassadors to feel empowered and knowledgeable about accessibility on Xbox. This will include missions like trying new accessibility features on your console or learning more about what features are available to make games accessible for everyone. New missions will be added under this tab over time, so make sure you check the missions tab often!
